

## E-Safety Top Tips

We held a Parents Information Morning about E-Safety on Wednesday 9th November. Parents learned about how important E-Safety is and discussed how they could help to keep their children safe online.

**Parents created their own set of 'Top Tips'** and we have shared these with you on our school website:

1. Set a time limit with your child. Agree how long they can spend online.
2. Use computers and personal devices (iPads, tablets, mobiles) in a central place where family congregate, so you can see what your child is doing.
3. Agree on which apps or websites are age appropriate beforehand.
4. Regular monitoring of what they do. Talk to your child about their online habits.
5. Set your primary settings/parental controls.
6. Communicate regularly with your child in their first language – BSL.
7. Give your child the message that 'It's good to tell' an adult (parent or teacher).
8. Make your child aware of the positive influences, as well as the negative ones.
9. Educate yourself on any apps which your child wants to use and then you decide if it is appropriate.

If any parent requires further help, information or support, please contact school or explore some of the links mentioned on this page.
